

The Price is Right

Purchase 5-8 items (such as candy, cookies). Nothing over \$5. Then, draw the name of a passenger who is asked to make a guess at what the actual price of the item is. If they are wrong, tell them if that amount is high or low. Then draw another name for a chance to guess the price. Continue this pattern until someone correctly guesses the exact price of the item. The person who does, wins the item.
